

WorkerFIT is a Fitness-for-duty Innovation Technology platform that supports HR programs for hiring, safety, and integrated disability management. It improves how employers analyze job demands, how providers address worker fitness-for-duty, and how job modifications are implemented to promote worker safety and productivity.

Provider
Services

Highlights

- **Analyze** jobs or workers to validate skills, physical abilities, cognitive abilities, or safety equipment use.
- **Reference** images, documents or links for groups, jobs, functions, modifications, providers, or exams.
- **Share** job, function, modification, provider or work fitness exam reports through a secure web portal.
- **Track** injuries, disability, and job modifications.
- **Establish** job-specific fitness exams and referral instructions to promote consistent administration.
- **Qualify** worker skills, physical abilities, or cognitive abilities to assess readiness for jobs or functions.
- **Search** for workers, jobs, functions, modifications, and providers by rating, group, location, etc.
- **Request** Examiner Report of WorkerFIT to assess worker fitness-for-duty and functional progress.
- **Create** modified duty assignments to promote RTW.
- **Manage** individual worker job modification plans.
- **Standardize** job modifications to rate effectiveness.

Report Examples

- **Examiner Summary of WorkerFIT**
(Worker fitness-for-duty analysis)
- **Job Qualifications Profile**
(Required job abilities and skills)
- **Job Description**
(Summary of essential job duties)
- **Ergonomic Function Analysis**
(Review of job function demands)
- **Worker Qualifications Profile**
(List of worker abilities and skills)
- **Modification Description**
(Review of modification solution)
- **Provider Description**
(Review of provider services)

WorkerFIT eliminates inefficient paper reporting about jobs and worker restrictions much like QuickBooks did for accounting.
